

Eslam Nasr Ahmad Abdel Aal

Junior Backend Developer (.NET)

Cairo, Egypt | +20 1117554969 | eslamnasr413@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [YouTube](#)

PROFESSIONAL SUMMARY

Junior Backend Developer focused on building real-world systems using C#, SQL Server, ADO.NET, and layered architecture. Experienced in designing relational databases, authentication & authorization, and business logic implementation. Currently expanding expertise in ASP.NET Core, RESTful APIs, Entity Framework Core, and JWT Authentication.

TECHNICAL SKILLS

Languages:	C#, C++, SQL
Backend:	ADO.NET, LINQ, DTO Pattern, Layered Architecture, Authentication & Authorization, Async/Await, OOP
Databases:	SQL Server, Relational Database Design, Data Modeling, Stored Procedures
Tools:	Visual Studio, Git, GitHub, WinForms

PROJECTS

DVLD – Driving & Vehicle License Department System

C# · SQL Server · ADO.NET · WinForms · Layered Architecture | github.com/BackendMindset/DVLD-System

- Designed a normalized SQL Server database covering licenses, applications, tests, drivers, and users.
- Applied 3-tier architecture: Presentation, Business Logic, and Data Access layers with full separation of concerns.
- Implemented secure authentication with password hashing, and a role/permission management system.
- Built complete CRUD operations with search and filtering; used DTO Pattern and Async/Await throughout.
- Modeled real-world driving license workflows including application lifecycle and test scheduling.

ATM Management System

C++ · OOP · File Handling | github.com/BackendMindset/ATM-System-CPP

- Built a console-based banking and ATM system applying OOP principles, modular screen architecture, and separation of concerns.
- Covered user authentication, account management, transaction processing, input validation, and file-based persistent storage.

C++ Problem Solving Repository

C++ | github.com/BackendMindset/CPlusPlus-Problem-Solving

- Solved 250+ programming problems spanning algorithms, strings, matrices, date logic, and client management systems.
- Strengthened problem-solving skills, algorithmic thinking, and clean function design through continuous practice.

EDUCATION

Beni-Suef University — Bachelor's Degree in Mathematics Education, Faculty of Education

Expected Graduation: 2026

TECHNICAL CONTENT CREATION

Backend Mindset — YouTube Channel

youtube.com/@BackendMindset · Started: May 2025

Creating educational Arabic-language content on C# & .NET Backend Development; currently covering database relationships and DAL/BL layers through the DVLD project series.
