

Eslam Nasr Ahmad Abdel Aal

Junior Backend Developer (.NET)

Cairo, Egypt | +20 1117554969 | eslamnasr413@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Backend Developer focused on building real-world systems using C#, SQL Server, ADO.NET, and layered architecture. Experienced in designing relational databases, implementing authentication & authorization systems, applying OOP principles, and developing business logic with multi-layered architecture. Strong understanding of DTO patterns, asynchronous programming, and software architecture concepts. Currently expanding expertise in RESTful APIs, ASP.NET Core, Entity Framework Core, JWT Authentication, and scalable backend systems.

TECHNICAL SKILLS

Languages:	C#, C++, SQL
Backend:	ADO.NET, LINQ, DTO Pattern, Layered Architecture, Authentication & Authorization, Async/Await, OOP
Databases:	SQL Server, Relational Database Design, Data Modeling, Stored Procedures
Tools:	Visual Studio, Git, GitHub, WinForms

PROJECTS

DVLD – Driving & Vehicle License Department System

C# · SQL Server · ADO.NET · WinForms · Layered Architecture | github.com/BackendMindset/DVLD-System

- Designed a relational SQL Server database for licenses, applications, tests, drivers, and users.
- Applied 3-tier architecture: Presentation, Business, and Data Access layers.
- Implemented secure user authentication with password hashing and role/permission management.
- Built CRUD operations with search/filtering, DTO pattern for layer data transfer, and async DB operations.
- Designed business workflows based on real-world driving license management processes.

ATM Management System

C++ · OOP · File Handling | github.com/BackendMindset/ATM-System-CPP

- Developed a console-based banking and ATM system using OOP principles.
- Implemented user authentication, account management, and transaction processing workflows.
- Applied modular architecture, separation of concerns, validation mechanisms, and file-based data storage.

C++ Problem Solving Repository

C++ | github.com/BackendMindset/CPlusPlus-Problem-Solving

- Solved 600+ programming problems over 3 years, covering algorithms, strings, matrices, date calculations, and client management systems.
- Demonstrated strong algorithmic thinking, problem decomposition, and clean reusable function design.

EDUCATION

Beni-Suef University — Bachelor's Degree, Computer Science

TECHNICAL CONTENT CREATION

Backend Mindset — YouTube Channel

youtube.com/@BackendMindset

Creating educational content on Backend Development, C# & .NET, SQL Server, Software Architecture, OOP, and real-world engineering concepts.

LANGUAGES

Arabic (Native)
